USP

- **Intergration with Tally Accounting software** requires no change in existing systems.
- **Extensive Customization possible.** User Definable custom fields, Taxes, Terms & conditions etc. User Definable document Printouts (Invoice / PO Formats / MRN etc.) Advanced Reporting systems with User definable parameters.
- **Hand Holding Implementation Approach**
We understand user requirements and train them according. We even provide facility for resident engineers where client do not have dedicated ERP admin to administer the ERP and provide retraining to staff at a reasonable cost.
- **Report Scheduling**
You don't need to login to the system to view reports , as you can get it on your mail automatically.
- **Cloud Hosting**
No additional Software and Hardware required.

- **Extensive WIP Production Module**
Track your production for each stage, machine, shift & operator. Also track rejections, reworks. Wastages, scraps for each production.
- **Extensive Item Tracking**
Use batch tracking, serial numbering, multiple measurement units.
- **Advance Requirement Planning (MRP) for production (In-House) and job work.**
- **Automatic Vendors Scheduling and Purchase Indent Generation.**
- **Repacking, Reprocessing and Replacement of Material.**
- **In-depth Features for Landed cost Calculation including Post Transaction Costs.**
- **Unlimited PO Amendment and Tracking.**
- **Supplementary Invoice for retrospective rate amendments.**
- **Multi-Currency Support.**
- **Web base Authorization sitting anywhere in the world.**
- **Export documentation: ARE, Annexure and Export Sales Invoice.**
- **Offline Invoices at Depot / warehouse**
